

AN INTRODUCTION TO Mosciano's flavor LIBRARY

You can look for materials by entering search terms in one or more boxes.

Also, you can enter multiple terms in the taste, odor and applications fields.

Clicking on the question mark buttons at the right reveals pop-up windows to clarify each search option.

Clicking on "taste descriptors," "odor profile" or "possible applications" reveals a pop-up window with a list of commonly used terms. Clicking on a term will automatically place it in the search field.

Search Results appear in alphabetical order by material name. The source of the material is provided, along with the odor concentration and taste ppm in which it was evaluated.

Click "Search Again" to modify your search or begin a new one.
